METRIC5 CLIENTS AND CAPABILITIES

US Patent and Trademark Office – Human Resources Information Systems Division

Provides IT project management and technical support for the Human Resources Information Systems Division. Conducts business process reviews division-wide, documenting existing processes and recommending improvements. Acts as a liaison for third-party systems, developing and conducting training on those systems and responsible for system data reporting.

US Department of the Treasury – Office of the Chief Information Officer – Enterprise Business Solutions

Provides Subject Matter Expertise, Project Management, Quality Assurance and IV&V for a Shared Service Center with complex, customized and integrated systems that services over 200k users across multiple federal agencies. Supported quality assurance and test strategy efforts for the upgrade to PeopleSoft 9.2 and PeopleTools 8.55.

US Department of the Treasury – Office of DC Pensions – STAR System Maintenance

Directs Operations and Maintenance for a highly customized federal system that provides over \$500m annually in pensions and benefits to annuitants. Delivered multiple enterprise system upgrades under budget and with respect to the planned project timeline. Implemented automated testing tools to reduce the amount of resources used to perform recurring tasks.

US Department of the Treasury – Office of DC Pensions – Benefits Administration

Provides Quality Assurance oversight on behalf of the federal government to ensure the proper calculation of pensions for retired teachers, judges, police and firefighters. Ensures that benefit payments are accurately disbursed for a pension fund to over 14,000 annuitants. Built and maintains a data repository to generate reports, track payment reviews, provide status of disposition of errors, and other data.

US Department of the Health and Human Services – Office of Emergency Management - Business Process Mapping and Governance Analysis

Provides IT management consulting to analyze existing process and to recommend a future state. Incorporates quality management processes and measures into the future state to continuously assess and improve the quality of the support provided. Analyzes and examines the existing portfolio of IT support and recommended improvements.

US Department of the Health and Human Services – Assistant Secretary for Preparedness and Response – NextGen Phase II Enterprise Architecture Support

Developed an Enterprise Wide IT Architecture Framework and designed a common Information Technology Architecture Framework for system integration, process automation, cloud migration and consolidation of IT organizations. Defined IT Governance processes to support compliance with FITARA.
